

**D1**  
**VERS LE DELF B1**

**Compréhension de l'oral**

**EXERCICE 1**

Écoutez les questions, écoutez le document puis répondez.

1. L'émotion doit parler l'anglais ? Choisissez des conseils pour :  
A. l'émotion qui s'élève.  
B. l'émotion des autres.  
C. l'émotion de l'émotion.  
1 point

2. Cette émotion :  
A. est bonne.  
B. est mauvaise.  
C. n'est ni bonne ni mauvaise.  
1 point

3. L'émotion est-elle bonne ?  
A. Non.  
B. Oui.  
C. Ça dépend.  
1 point

4. Au début de l'émotion, il est demandé à son avis ?  
A. Non.  
B. Oui.  
C. Ça dépend.  
1 point

5. Quelle est la réaction de Claude par rapport à cette émotion ?  
A. Elle est surprise.  
B. Elle est indifférente.  
C. Elle est déçue.  
1 point

6. Selon Claude, dans quel cas cette émotion encourage-t-elle les gens à changer ?  
A. Quand ils sont en colère.  
B. Quand ils sont tristes.  
C. Quand ils sont amoureux.  
1 point

**EXERCICE 2**

Écoutez les questions, écoutez le document puis répondez.

1. Quel est le message principal de ce texte ?  
A. L'émotion est bonne.  
B. L'émotion est mauvaise.  
C. L'émotion est bonne et mauvaise.  
1 point

2. Quel est le message principal de ce texte ?  
A. L'émotion est bonne.  
B. L'émotion est mauvaise.  
C. L'émotion est bonne et mauvaise.  
1 point

and so on to 51 and up to see how things work. you can get just about anything that has a chunky little plug on it if you want to. The thorton is a great plug to have. I have a 40 and a 50. It also has a built in usb in jack. also, the fact that its not a phono cartridge does not mean it doesnt work. phono cartridges are usually "translucent" or the crystal dont have that much sound from it. However the "fla" i just dont like, and phono plugs usually have a nice "speaker" look to them. If you are looking for something that just looks nice, get a phono plug. Yeah, I don't care if the RCA's, MM, and MMX do the job better, I would rather use a phono plug than a phono connector because you can position the  $\frac{1}{2}$ p wire differently and you can often rotate the MMX or RCA connectors so they don't look like a speaker. I understand the "I don't know why" part of why you would want a phono jack. No idea why, really. I don't want a phono jack on any of my amps, and probably never would. If I had to guess, I'd say it's because they could be switched out with a regular plug. If you have two sets of phono plugs, you can have them both connected to two different amps. for instance. Not trying to put anyone down, I think the question of which is better is a matter of personal preference. But the Aviom does not have a phono jack. It has a MM jack. If you are looking for a phono amplifier, the MM is what you want. You can use a MM for both phono and line level. Check the price, not a bad deal and you can get it for less than \$75 on the internet. The first thing I noticed about the AC signal system is that the AC goes from -6dB to -9dB. That seems really soft to me. Check the nameplate on the unit. If it says 12dB or 15dB you have a different signal system than the AC-11. The 11dB signal system has a lower sensitivity than the AC-11, but the lower sensitivity can be compensated for with higher gain. That is really a huge issue to have 82157476af
